

Good Morning, we at 2 Broadway think the Sky Pro is one of the most ingenious pieces of equipment to be made available to building owners, managers, cleaning companies. It reduces the cost of window cleaning services dramatically, in our case close to 50K per year. Our building is a 1.6MM sq ft curtain walled facade with a number of set backs. It would take a full year for our regular window washers to complete two (2) full cleaning cycles off of the "house rig" (scaffolding) with the Sky Pro we can do it in two, six (6) week cycles, we have also been able to reduce our liability exposure by not having "bodies" over the side of the building, just a piece of equipment.

The people over at Sky Pro/ Nustar are true professionals and the follow up and support you receive from them is unprecedented in this day and age of companies wanting to just make a quick buck.

Highly recommend this equipment.

If I can be of any further help please don't hesitate to reach out to me.

Regards

Robert Thomson
Manager
