Dear Mr. Lange,

When I first heard about automated window cleaning systems, I was skeptical. How will the windows look after cleaning them with just pure water? Personally, it looked amazing!

Not to mention all of the safety aspects the Sky Pro-Mini system brings to the table. The unit, not a person, is the only cleaner that suspends on the façade of the building. Assembly and disassembly of the Sky Pro-Mini system is equal to set-up and break-down time for rope descent systems.

Being in the window cleaning industry for over 25 years, I never thought the day would come when cleaning windows can be achieved with the touch of a button.

Sincerely,

Jon A. Arreguin
Owner/Operations Manager
